Glow Vitamin C

A brighter look.
A smoother feel.

aestion Glow Vitamin C Booster

30 mL / SKIN LONGEVITY CARE

Vitamins. Capsules. Retinal.

A 30 mL booster for radiance, texture and a hydrated finish.

5%

A vitamin blend for dull-looking skin

An eight-vitamin complex makes up 5% of the formula.
Three forms of vitamin C sit alongside niacinamide.

C

Vita-C capsules that blend into the serum

Shell-free capsules release under fingertip pressure.
Smooth them into the skin together with the serum.

100

Retinal for smoother-looking texture

100 ppm retinal is paired with adenosine and peptides.
A formula designed with texture and firmness in mind.

Packaging visualization

Daily radiance.
Skin Longevity Care.

Eight-vitamin complex at 5%

A serum combining multiple vitamins, Vita-C capsules and retinal.
Designed for dull-looking skin and uneven texture.

Brightening, firmness and wrinkle care

A dual-functional cosmetic in Korea for brightening and wrinkle care.
Developed as a daily turnover serum.

Packaging visualization

"Without irritation" in the supplied copy is a concept claim, not a verified irritation-test result.

The vitamin family 1

A complete view of the vitamin-related ingredients in the formula.

C

Vitamin C

Ascorbic Acid (10 ppm)
Sodium Ascorbyl Phosphate
Ascorbyl Tetraisopalmitate

A

Vitamin A

Retinal (100 ppm)
Retinol · Retinyl Palmitate

B3

Vitamin B3

Niacinamide

B5

Vitamin B5

Panthenol

E

Vitamin E

Tocopherol ·
Tocopheryl Acetate

"Eight vitamins, 5%" follows the carton claim. This lists all vitamin-related ingredients, not 5% pure vitamin C.

The vitamin family 2

A complete view of the vitamin-related ingredients in the formula.

B1

Vitamin B1

Thiamine HCl

B2

Vitamin B2

Riboflavin

B6

Vitamin B6

Pyridoxine HCl

K3

Vitamin K3

Menadione

P

Vitamin P

Rutin

"Eight vitamins, 5%" follows the carton claim. This lists all vitamin-related ingredients, not 5% pure vitamin C.

Three forms of vitamin C

Three vitamin C ingredients listed in the formula.

01

Ascorbic acid

A form of vitamin C.
Listed at 10 ppm in the product ingredients.

02

Ascorbyl tetraisopalmitate

A vitamin C derivative.
Included alongside the other vitamin C ingredients.

03

Sodium ascorbyl phosphate

A vitamin C derivative.
Part of the wider multi-vitamin formula.

Vita-C capsules without a coating shell

Texture concept visual

Outside: an oil-thickening structure

A naturally derived oil thickener maintains the bead shape without a separate artificial coating shell.

Inside: oil-soluble active ingredients

Oil-soluble ingredients sit within the bead.
Fingertip pressure releases them as the bead breaks down.

Ingredient technology: NEOCHEM KOREA "Shell Free Bead" Ingredient Profile, as cited in the supplied deck.

What the capsule technology is designed to offer

Packaging visualization

Fresh ingredient release

Application pressure opens the bead
and releases the active ingredients inside.

A finish designed to avoid residue

The shell-free structure is designed to melt into the serum without shell residue or pilling.

No polymer coating shell

The supplied deck describes the capsule technology as "microplastic-free".

These are ingredient-technology claims, not certification or performance testing of the finished product.

Protected in the bead.
Released as you apply.

01

Stabilization in the bead

The supplied technology description aims to protect oxidation- and light-sensitive ingredients within the bead.

02

Release under application pressure

The bead releases under gentle fingertip pressure.
Its contents blend with the serum.

03

Even application

Smooth evenly over the face.
The technology aims for a fresh finish without residue.

A description of the supplied technology, not quantitative proof of finished-product absorption or oxidation protection.

100 ppm retinal for texture care

Retinoids, adenosine and peptides in one formula.

Retinal · Retinol · Retinyl palmitate

The formula contains three retinoid ingredients.
Retinal is listed at 100 ppm.

100

RETINAL / ppm

Adenosine and six peptides

Adenosine and six peptides complement the blend.
Selected with smoothness and firmness in mind.

The supplied deck describes retinal as "one step ahead of retinol". This ingredient rationale does not establish superior product efficacy.

Six peptides for the skin care blend

The full peptide blend, alongside retinoids and adenosine.

6

PEPTIDES

Tripeptide-1
Listed in the product formula.

Palmitoyl Pentapeptide-4
Listed in the product formula.

Copper Tripeptide-1
Listed in the product formula.

Oligopeptide-1
Listed in the product formula.

Hexapeptide-9
Listed in the product formula.

Acetyl Hexapeptide-8
Listed in the product formula.

Moisture and comfort complete the formula

Panthenol 1% · Glycerin

Humectants complement the vitamin blend.
Panthenol at 1% is reported in the supplied deck.

Sodium hyaluronate · Ectoin

Ingredients selected for hydration and conditioning.
They support a softer, moisturized feel.

Gardenia extract · Aminobutyric acid

Included in the supplied moisture-and-calm blend.
Tocopherol also complements the overall formula.

Concentration source: supplied deck. The manufacturer's original percentage formula was not available.

Hydration concept visual

Brightening and wrinkle care

A dual-functional cosmetic under the Korean product classification.

2%

Niacinamide 2%

Helps brighten the complexion.
The vitamin blend complements skin-tone care.

A

Adenosine and three retinoids

Helps improve the appearance of wrinkles.
Retinal and six peptides complement texture care.

Niacinamide 2% is reported in the supplied deck. The original percentage formula was not available.

Smooth on.
Let it absorb.

Apply an appropriate amount evenly over the face.

01 **Dispense after cleansing**

After cleansing and preparing the skin,
dispense an appropriate amount.

02 **Smooth**

Gently release the capsules with your fingertips.
Spread the serum evenly over the face.

03 **Let it absorb, then apply cream**

Gently press with your palms to help it absorb.
Follow with cream.

Use sunscreen during the day. Store away from direct sunlight and avoid use on wounded skin.

Packaging visualization

One-month accelerated stability test

Reported observations of pH, odor, color and separation under five storage conditions.

Parameter	5°C	25°C	38°C	50°C	Cycle
pH	Stable	Stable	Stable	Stable	Stable
Odor	Stable	Stable	Stable	Stable	Stable
Color	Stable	Stable	Stable	Slight fading	Stable
Separation	Stable	Stable	Stable	Stable	Stable

Observations at 7 days, 14 days and one month. Slight fading reported only at 50°C.

Manufacturer statement quoted in the deck: "**One month at 38°C = one year at room temperature**".
This is the supplied statement, not a universal equivalence or an independently verified shelf life.

Source: supplied deck, p.11. Cited lab: LS Cosmetics / SEF4388-YJ02A / 2026-09-02. Original report not available.
